

CompassPoint Solutions Landed Cost

Simplify and streamline tracking shipment costs

About Us

Green Beacon Solutions partners with clients to implement integrated financial, supply chain, sales automation, and marketing business solutions built on proven Microsoft technologies. Our unique combination of technology, people, and process quickly help identify and implement expert strategies that support our client's business objectives within the distribution, professional services, banking/banking services, and manufacturing industries.

Why Green Beacon?

Our technology and consulting expertise, combined with our success in solving customer issues, have resulted in our unmatched industry reputation. We have an outstanding track record developing, delivering, and integrating ERP, CRM BI and Marketing Automation technology solutions that deliver direct business benefits for our customers.

Reduce Manual Effort for Accurate Inventory Valuation

Many distributors and manufacturers struggle to keep up with the dynamics of importing goods and the flexibility required in cost allocation methods. When goods are imported, it is necessary to capture the additional costs—such as customs charges, freight, insurance brokerage fees and duty, to determine the landed costs of imported goods.

Landed Cost helps to simplify and streamline the often laborious and time consuming task of tracking shipment costs. The module enables these tasks to be completed efficiently across all shipments and will significantly reduce the amount of manual effort required. Thanks to a tight integration with Purchase Orders in Microsoft Dynamics AX, your costing and shipment tracking will be accurate and efficient.

Shipments (1 - cnu) - Shipment Number: shp000185, Eureka

Various Cost Allocation Methods

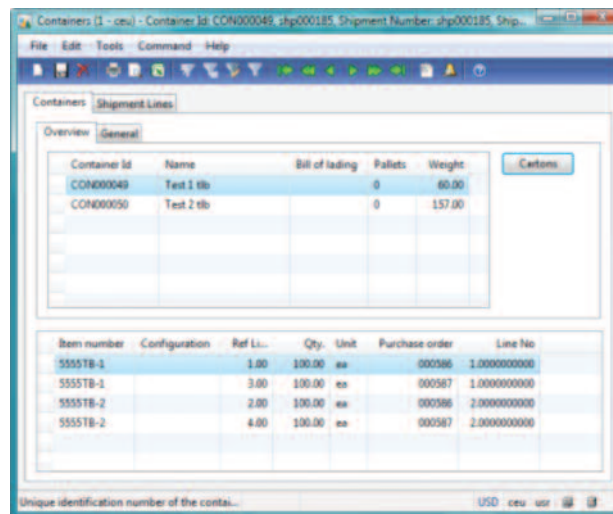

With Landed Cost distributors and manufacturers can calculate accurate inventory valuations by including additional charges beyond item purchase cost. The system supports a range of cost allocation methods. Adding the landed cost to your inventory valuation enables you to calculate an accurate cost and profit analysis of vendors, clients and projects.

Efficient and Accurate Delivery

Landed Cost is designed to make tracking shipments, and the ability to communicate delivery schedules to customers fast and easy. Updates to shipments flow down to all of the PO lines in the shipment, and post to inventory. This allows Sales and Customer Service Reps to accurately estimate the delivery schedule of goods to a customer.

Cartons and Containers

Items in a shipment may optionally be allocated in the system to the containers and cartons to record details of how they have been packed for transport on the ship. Goods can be received by carton and/or container making the task of getting stock into inventory much quicker.

Key Features

- Manage multiple PO's in one shipment
- More accurate estimation of stock arrivals
- Control all costs associated with a shipment across multiple PO's and reflect costs in inventory
- Receive goods by carton and container
- Easily allocate costs across multiple PO's and items within the PO
- Partial shipment of PO lines with tracking
- Mass update of PO lines with shipment dates
- Shipment charges accruals framework
- True inventory costing with all charges for margin analysis

Maintain Microsoft Dynamics AX with Green Beacon's
